Use PAN as control record for client identification and segregation

ia-seg-01

Title

Before · Segregate Family of Clients

After · Use PAN as control record for client identification and segregation

Summary

Before · Treat family members as a single client for PAN purposes.

After · Investment Advisers (IAs) must use the Permanent Account Number (PAN) of each client as the control record for identification and client level segregation.

Required Action

Before · Reckon the family of clients as a single client and use joint and several control records.

After · Use PAN as the control record for client identification and segregation

Evidence

Before · PAN details of all family members.

After · Client records with PAN details

Frequency

Before · one_time

After · ongoing

Verbatim Text

Before · "In case of an individual client, “family of client”³ shall be reckoned as a single client and PAN of all members in “family of client” would jointly and severally be the control record. However, the same is not applicable for non-individual clients."

After · Permanent Account Number (PAN) of each client shall be the control record for identification and client level segregation.

> Do Not Seek Power of Attorney

> Client Level Segregation of Advisory and Distribution Activities

> Jointly and severally use PAN of all members in a family as control record for individual clients

Review changes before taking action.
